Sentinels

Attention is a criminal's worst nightmare.

Sentinels draw extra attention to dark or at-risk areas of your perimeter, sending criminals running.

If The Electric Guard Dog™ fence protecting your perimeter goes into alarm, the Sentinel is triggered to sound its sirens, flood the area with light, and flash powerful LED lights to both deter the criminal activity and bring attention to the area that criminals are attempting to breach. Multiple Sentinels can activate individually or as a cohesive unit.

A Sentinel consists of:

2 Sirens

4 Flood Lights

1 Red / Blue Light Bar

Sentinels are often placed at the main gate and in the dark, remote areas of your perimeter, where criminals are most likely to strike.

Flexible Configurations:

Just like our fence, Sentinels are 100% solar powered, allowing them to be placed in remote parts of your perimeter.

Sentinels can be built as standalone units or we have a more economical option that converts the electronic poles of the EGD fence to Sentinels.

Sentinel installs are fully customizable based on site needs

Solar power makes for easy installation anywhere inside the perimeter
