

STG Logistics Newark Secures A Win For Operational Efficiency

CUSTOMER:
STG Logistics

OUR EXPERTISE:
Perimeter Security +
Security Integrator

- Electric Guard Dog™
Perimeter Fence
- Gate Access Control
Integration & Interface

GOALS/OBJECTIVES:

- Eliminate the expense of a
“Last Security Guard”
- Control site-wide security
access without slowing down
operations
- Remote gate access,
management and visibility
- Integration with existing
perimeter security

CHALLENGE: How STG Logistics Tackled Security Challenges

STG was faced with several key issues with their existing setup, including unreliable and expensive traditional security guards and slow, inefficient traffic flow that was costing valuable time. There was a clear need for an automated access control solution to streamline operations, improve efficiency, and enable remote management of access exceptions.

SOLUTION: Enhanced Visibility and Control

AMAROK emerged as the ideal partner for STG, leveraging their expertise in camera technology, perimeter security, and a proven industry track record to deliver a cutting-edge solution for this location. Their seamless integration with STG's existing security systems provided a cost-effective and efficient enhancement without requiring additional infrastructure changes. By relocating the gate to optimize truck access and reduce bottlenecks, AMAROK enhanced operational efficiency while effectively addressing the access control requirements.

RESULTS: From Guards to Gate Access – Unlocking Seamless, Uninterrupted Operations

Since transitioning to 24-hour operations without guards, efficiency has significantly improved, thanks to AMAROK's reliable monitoring service. By eliminating delays caused by guard management and streamlining processes, the site now enjoys uninterrupted gate operations and enhanced productivity.
